

What do the UM5J, XE4F and UM3DG have in common?

They all offer an enhanced display experience - courtesy of LG

The 98" and 110" UM5J large screen signage display

The sophisticated design of the UM5J combined with a picture quality that is 4x higher definition than Full HD, offers an enhanced, immersive viewing experience. Although both the 98" and 110" UM5J display screens are enhanced to offer optimal user and viewer experiences, the 110" UM5J is the ideal choice to make a long-lasting impact in any space. With a spectacular brightness of 500 cd/m², this large-screen display delivers clear, attention-grabbing content to the public.

The outstandingly visible XE4F display

Boasting a powerful brightness of 4,000nits, it provides a clear and vivid picture quality, even under direct sunlight. IPS technology provides better control of liquid crystals, which in turn allows the screen to be viewed at virtually any angle – meaning that any content will be extremely hard to miss!

The UM3DG digital signage display

The 65UM3DG is renowned for its exceptional and vivid Ultra HD resolution capabilities. Providing users with a picture resolution that is 4x higher than Full HD – it exaggerates and brings to life the colour and detail of any picture. Supporting HEVC, the display screen compresses/decompresses high-capacity UHD contents, playing ultra-high-quality videos with half the network traffic.
